THE CARMEN M. DELGADO TRAINING ROOM
Dedicated to
Carmen Milagros Delgado Ortiz, RN, LPN
18/12/2000 - 20/11/2020
In great recognition of her professionalism, dedicated service, and excellent care to the
staff at Rodriguez Army Health Clinic and the beneficiaries we are privileged to serve.
During her twenty years of service, Ms. Delgado's leadership, competence and
compassion for Service Members and their Families, demonstrated the highest standard
of excellence and served as an inspiration for all. This training room stands to honor
her legacy and serves as motivation for personal development, professional growth,
and empowerment.

TROGLITTER

TroGlitter is a cast acrylic that is mixed with glitter particles. The cast acrylic is easy to cut and can also be engraved. The material is color stable with no bleaching or fading. The glitter particles in the material make the cut edges look more matt than glossy, in contrast to normal acrylic. Since the base material, like the TroGlass series, is made of cast acrylic, processing is very similar to our existing acrylic.

TROGLASS MIRROR

TroGlass Mirror is extruded acrylic glass that has a reflective surface. TroGlass Mirror is the perfect alternative for glass because it has many advantages over glass mirrors. Mirror acrylic sheets have a higher resistance to breakage than glass and are lighter, with the advantage that this material has a lower risk of falling and breaking when mounted on a wall. The material base consists of extruded acrylic glass with a very small thickness tolerance.

PLYWOOD Y MDF

Our poplar PLYWOOD sheets are untreated and perfect for laser cutting, engraving, and painting. Compared to traditional plywood, they produce less residue during engraving. Our plywood sheets are formaldehyde-free, lightweight, soft, and easy to work with. The thin, cross-plied poplar veneers create a stable wood material.

trotec
laser.marking cutting engraving

setting new standards

The laserable and engravable MDF fiber board panels feature a high surface quality and homogenous fibre structure. The high fibre density allow for great results even in fine-detail laser cutting.

TROPHYFLEX ⚡⚓Ⓕℙ💡

Espesor: 0.015"   Tamaños: 12" x 24"

TrophyFlex is the industry's favorite thin gauge flexible acrylic composite designed for laser engraved plates and labels. With a durable micro-surface finish in a .015" thickness, this adhesive backed substrate has exceptional durability and integrity for projects on curved or flat surfaces. A superior product Made in the USA for trophies, plaques, ID plates/labels, signage and more. TrophyFlex is the perfect print media for UV-LED label applications.

ALUMA MARK
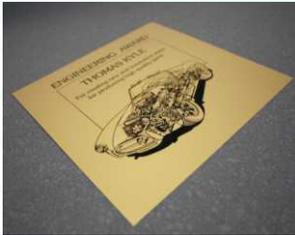

ROW Mark-Gold	ROW Mark-Silver	ROW Mark-Bronze
Satin Gold	Satin Silver	Satin Bronze

Interior

Espesor .020"
Tamaño 12" x 20"

AlumaMark is specialized aluminum that may be imaged or marked using a CO2 laser. Unique among laserable substrates, AlumaMark allows one to create black, positive marks on silver, gold, bronze, brass, or colored backgrounds. Designed so that it may be marked using low power settings, AlumaMark is used to produce Nameplates, Name Badges, Plaque and Trophy Plates, Labels, Interior Signage, and more.

Because AlumaMark is not etched or engraved, but rather marked through a thermal reaction with the heat of a laser, it is possible to create lighter marks and halftone shades. This makes AlumaMark ideal for creating photograph and detailed artwork reproductions.

DURA BLACK

Performance Adhesive
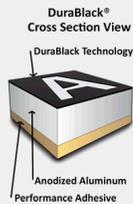

ROW DuraBlack
Negro Mate

Exterior

Espesor .020"
Tamaño 12" x 20"

DuraBlack® is CO2 laser markable aluminum for durable, on-demand marking for harsh operating environments. In side-by-side tests, DuraBlack outperforms black anodized aluminum and laser markable acrylic tape in select applications. DuraBlack is resistant to sunlight (UV-radiation), abrasion, high-temperatures and chemical exposure. Because of its ability to perform across a range of challenging environments, DuraBlack meets several government, industrial and military specifications including MIL-STD 130N, A-A-50271 (≈MIL-P-514D) and MIL-STD-15024G, Type L.

Composed of a multi-level coating available upon 0.005" or 0.020" thick aluminum, DuraBlack can be attached to either curved or flat surfaces with adhesive, rivets or screws. It is imaged with any Co2 marking laser to produce a durable, high-resolution barcode or human-readable image.

ROWLASERBOND-100

AEROSOL 12 OZ.

Para Stainless Steel, Cerámicas y Cristal

PERMANENT MARKING

LaserBond 100 uses the latest in sub-micron and nanoparticle materials to more efficiently absorb the laser energy in order to quickly produce permanent marks on a variety of different surfaces.

FULLY TESTED

Physical and chemical testing has proven that the marks created using LaserBond 100 are resistant to acids, bases, various solvents, outdoor exposure, high temperatures and mechanical abrasion.

SUPERIOR FORMULATION

The LaserBond 100 materials absorb the laser energy and quickly produce the high temperatures that create the permanent, co-valent molecular bonds with various different substrate materials.

LaserBond™ 100

LBT
Laser Bonding Technology

Marks on Most Metals, Glass, Ceramic & Stone

ALL PURPOSE BLACK LASER MARKING MATERIAL

Quick & Easy to Use
Permanent & High Contrast
Resistant to Corrosion, Abrasion & Fading

DANGER
Extremely Flammable
Harmful if swallowed or inhaled
Keep out of reach of children

NET WT. 12 OZ (340g)

EASY FOUR STEPS MARKING PROCESS FOR MOST METALS, GLASS & CERAMICS

How It Works

Laser Bonding Technology uses the precision of laser energy together with scientifically formulated marking materials to quickly and permanently bond to metal, ceramic, glass and other hard surfaces to create permanent, high-contrast, high-resolution images.

Adhesive mounted
❶ Surface
❷ Body with screw
❸ Letter
❹ Head with adhesive

Screw mounted
❶ Surface
❷ Body with screw
❸ Letter
❹ Head with screw

1 Using adhesive place the Head support on the back of the letters.

2 Place the letter against the template and use pressure to mark placement of pilot holes.
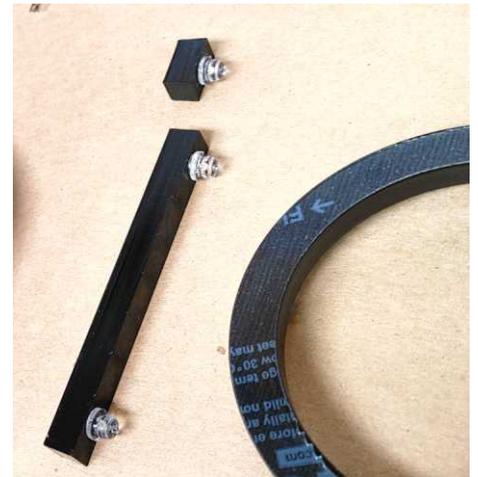

3 Place template and drill appropriately.

4 Attach Body ends in correct positions.

5 Securely Snap the letters into place using slight pressure.
